SUMMARY

- **8 years and 8 months** of professional experience in software development, specializing in Java applications using frameworks like Jersey and Spring.
- Proven ability to collaborate with cross-functional teams to meet business goals and deliver projects on time.
- Responsible for the entire project lifecycle: analysis, design, development, testing, and documentation.
- Hands-on experience in building scalable, high-performance applications using **Java, J2EE, Spring Boot**, and Agile methodology.
- Strong foundation in **Object-Oriented Programming (OOP)**, design patterns, and best practices for creating efficient, maintainable code.
- Committed to continuous learning, staying updated on industry trends and emerging technologies to drive innovative solutions.
- Consistently recognized for delivering high-quality software that meets business needs and exceeds client expectations.

TECHNICAL SKILLS

Programming Language	JAVA, JAVA 8
Java stack	Java, Java 8, Collections Framework, Multithreading
Framework	Jersey, Spring Boot, Hibernate
Primary Skills	Spring Core, Spring Boot, Spring MVC, Spring Batch, Hibernate, Java 8, JPA, Maven, Jenkins, Postman, GitHub, GitLab, Neo4J, SQL, MySql, Grafana, PLSQL, SonarQube, GraphQL, Splunk
Other Skills	Core Java, OOP's, Collections, Multithreading, Rest, Microservices, Json, Xml
IDEs	Eclipse IDE, IntelliJ IDE, Volante designer
Tools	Maven, Jenkins, Postman, Git, Apache camel.
Database	Neo4J, SQL, MySql.
Operating System	Linux and Windows

CAREER EXPERIENCE

COMPANY : WIPRO TECHNOLOGIES | CLIENT : UBS   *January 2024 — Present*
PROJECT : SANCHAYA AGGREGATOR

- 'Sanchaya Aggregator' was the platform which was the generic aggregator which helps to persist and expose all type of aggregations like tasks, cases, events data.
- My **responsibility** was to fetch or accepts latest feeds from source systems and persist in database.
- Expose REST API's to persist and update data in database.
- Expose GraphQL API's to expose data to user interface based on user role which provides features like pagination, filtering, sorting, grouping.
- Handling deployment for project on cloud server.
- Give training / KT sessions on new employee and maintaining documentation of features.
- Skills / Technologies: JAVA, Microservice, Spring boot, MySQL Apache Camel, Maven, Jenkins, Neo4J, Sql Server

---

COMPANY : WIPRO TECHNOLOGIES | CLIENT : CREDIT SUISSE   *July 2023 — Jan 2024*
PROJECT : CRX - CLIENT ASSESSMENT

- 'Client Assessment' was the platform which was providing the consolidated view for counterparty data. Here user can see all counterparty data for which he have access, and analyze the different measures like exposure, limit, risk measures.
- My **responsibility** was to expose API's to catch user actions and expose counterparty data by calculating required measures based on user role using Graphql endpoints which supports pagination, filtering, sorting, grouping functionality.
- Handling deployment for project on cloud server.
- Give training / KT sessions on new employee and maintaining documentation of features.
- Skills / Technologies: JAVA, Microservice, Spring boot, Sql Server, GraphQL

COMPANY : WIPRO TECHNOLOGIES | CLIENT : CREDIT SUISSE   *April 2022 — July 2023*
PROJECT : CRX - TASK MANAGER

- 'Task Manager' was the platform which was the aggregator for all type of tasks, which accepts tasks from different systems and provide the capabilities to the user / teams to analyze and priorities his day to day work.
- My **responsibility** was to fetch latest feeds from source systems and persist in database.
- Expose API's to catch user actions and expose user / team tasks based on user role using REST endpoints which supports pagination, filtering, sorting, grouping functionality.
- Handling deployment for project on cloud server.
- Give training / KT sessions on new employee and maintaining documentation of features.
- Skills / Technologies: JAVA, Microservice, Spring boot, MySQL, Jenkins, Maven, Neo4J, Sql Server.

COMPANY : VOLANTE TECHNOOGIES   *July 2020 — April 2022*
PROJECT : VOLPAY

- Understanding core product implementation and developing New features accordingly, Providing support for newly implemented improvement for changes or bug fixes.
- Worked in the core team and took responsibility for development and support of product related improvements.
- Handle the integration of the new version of the core product with the project.
- Handling deployment for project on cloud server.
- Give training / KT sessions on new employee and maintaining documentation of features.

COMPANY : GEOTRACKERS PVT LTD   *April 2019 — May 2020*
PROJECT : GEO-TRACKER

- "Geotracker" is a product where user can track & monitor your vehicle on online street level maps
- employing multiple zoom levels.
- Also user can Monitor direction and speed, View exact trace of route driven with time stamps. Monitor Over-speeding violations with timestamps. Get real time alerts in case your vehicle overspeeds.
- Understand the new requirements and providing and building solutions by adding new functionality in code.
- Understand the business requirements and do the implementation of features.
- Fix the various issues reported by Quality Engineers.
- Write test cases as per feature implementation and explain to quality engineers, perform Unit testing, do deployment on application server.
- Skills / Technologies: JAVA, REST , Hibernate, MySQL, Git

COMPANY : ATULSIA TECHNOLOGIES   *April 2016 — March 2019*
PROJECT: MEGASTORES

- "Megastores.com" is an online Social Marketplace helping artisans sell their authentic Handmade products globally assuring customers a quality purchase at a fair price. This assures customers an authentic quality purchase at a fair price. Traditional Indian handicrafts and handloom products from across India are available to shop on Megastores.
- Understand the new requirements and providing and building solutions by adding new functionality in code
- Understand the business requirements and providing solutions to meet the functional.
- Fix the various issues reported by Quality Engineers.
- Perform Unit testing, Do deployment on application server. Testing of new enhancements and fixes issues.
- Skills / Technologies: JAVA, Jersey, JBoss, Hibernate, MySQL, Git
